

Tufline ATVB Box Scrapers

Spread dirt, sand, and gravel without a tractor!

Tufline's ATV landscape box scrapers give you the ability to perform tough jobs when a tractor is not available. Our rugged built units are designed like our tractor mount models with high quality steel plate and tubing. The scraper moldboard offers proper blade pitch angles allowing good cutting and leveling of dirt. A replaceable cutting edge is standard on all units. The standard lever control wheel transport system offers five height options. This gives the operator load dispense options based on substance and applications. The ATVB box scraper is offered in 42" and 48" widths and is suggested for 300cc and larger ATV's.

ATVB BOX SCRAPER SPECIFICATIONS

- Frame: 2" square steel tubing with 1/8" plate box frame.
- Tires: Two 400 x 4 tires and integral wheel assembly with sealed bearings.
- Manual lever lift for wheel lift and height adjustment (Models ATVB-42 and ATVB-48).
