

## Tufline's ATVLR Landscape / Trail Rakes

**Rake your trails for a quiet entry to your hunting area, and much more!**

Tufline's ATV rakes are useful for many applications. These versatile implements allow for fast effective work with ATV's for building site clearing, trail development, yard maintenance and many more projects. The ATVLR rakes are constructed with 2" square tubing and a heavy angle iron main frame. The 15" spring steel rake tines are dual bolt mounted for rugged raking requirements. The rake bar angles either right or left for pulling trash or leaves in the desired direction. The transport frame offers lever adjusts wheel height options for different raking needs. Units offer a standard 1-7/8 ball-coupling hitch for a secure mount to the ATV.

### **ATVLR LANDSCAPE / TRAIL RAKE SPECIFICATIONS:**

- Frame: Heavy 3" angle and steel tube main frame.
- Rake Tines: 15" spring steel rake tines mounted on 1" centers with heavy bolt mount.
