

Tufline Utility Dump Carts

Move dirt, gravel and much more with your ATV!

Tufline's Utility Dump Carts are adaptable to many uses from landscape applications to camp hauling requirements in the deep woods. These carts are built rugged with a heavy gauge steel main frame and equipped with all terrain flotation tires. They are perfect for any tough hauling job. The main frame of both of these models has a baked powder coat enamel finish and high strength polyethylene body. It will not rust, rot or wear out. Both come with highway rated hubs with grease fittings and a 2" ball coupling standard. Evenly balanced and fitted with a tipper latch for easy dumping, these carts make easy work out of back wrenching work. Whether its moving mulch around the job-site or garden, carting seed to food plot locations, or hauling a trophy deer out of the deep woods, Tufline's Utility Dump Carts fit the bill.
